Building 1
Marine Corps Base
Camp Lejeune, North Carolina 28542

SUBJ: Five Year Review
MCB Camp Lejeune NPL Site
Jacksonville, North Carolina

Dear Sir:

The U.S. Environmental Protection Agency (EPA) Region 4 has reviewed the above subject decision document and concurs that the remedies selected for the fifteen operable units, which comprises twenty four sites, remain protective of human health and the environment. The remedies are supported by the previously completed Remedial Investigation, Feasibility Study and Baseline Risk Assessment Reports. They are also supported by the review of the current applicable or relevant and appropriate requirements (ARARs).

This document also provides a summary of the remaining eighteen sites included in the Installation Restoration Program at MCB Camp Lejeune. Discussions and recommendations are included in the text concerning all pending and ongoing remedial actions. These recommendations will undergo further review by my staff and will be documented by other reporting mechanisms.

EPA appreciates the coordination efforts of MCB Camp Lejeune and the level of effort that was put forth in developing this "Five Year Review" report. EPA looks forward to continuing the exemplary working relationship with MCB Camp Lejeune and Naval Facilities Engineering Command Atlantic Division as we move toward a final cleanup of the NPL site. If you have any questions, please contact Gena Townsend, of my staff, at (404) 562-8538.

Sincerely,

for Winston A. Smith, Director
Waste Management Division
